Other: _____

Comments: _____

Buysse Water Association Member:

Per EPA regulations we are required to conduct a Cross Connection Survey every 3 years. To those not familiar with cross connection, it is when a drinking water source is connected to a non-potable water source. Examples would be a garden hose submerged in a swimming pool or laying in a puddle in the yard. Should there be a sudden loss of water pressure a vacuum could be created that would pull the possibly contaminated water into your drinking water.

Please complete this form and return it to your board representative as soon as possible. If you have questions please contact your board member or me, Ken Johnson, at 309-234-5446. You may also email the form to kenlaurieJ@mchsi.com.

Thank you all for your help and cooperation as we work together to keep our water safe and clean.

Ken Johnson
BWA President
